

Real Yoga Certificate in Yoga Teaching

The Real Yoga training course covers all aspects of Yoga in a style that makes it as fresh and relevant today as it was thousands of years ago. We give a particular emphasis to the therapeutic aspects of Yoga practice within our teaching style, and train teachers to become intuitive and creative in their own practice and in their approach to teaching others.

Opportunities in Yoga

The opportunities for making a career in Yoga are full of creativity and much scope.

Teaching in adult education used to be the only way to experience yoga. Nowadays, privately run groups are more the norm. But there is also scope for one to one work, work in hospitals, residential homes, with children and in schools. These are just some of the varied possibilities. Relaxation classes and meditation groups provide support for positive health outcomes, and ways in which we can share the benefits of Yoga with more and more people. Real Yoga also offers a post graduate training to become a Yoga Therapist after the teacher training course is completed.

About Real Yoga – The training allows for the potential for personal change that the practice of yoga can bring. The Real Yoga course is designed to bring yoga practice fully into the context of modern lifestyle, from the physical asana practice, to the metaphysical spiritual philosophy. Whatever your religious beliefs the study and practice of Yoga can enhance your life. This training gives far more than the basics, offering a full picture and understanding of the foundations of yoga, with the modern knowledge of care of the body and the awareness of energy flow, taught in a friendly and open way.
